

Computer Room Decontamination and ESD Cleaning

Research by academics and also within the I.T. industry has concluded that over 70% of computer room failures are caused by environmental factors such as changes in humidity, room temperature or dust particles. The latter is often the direct cause of the failures due to humidity and temperature variations. Dust contaminants may include concrete, carbon, metallic, paper and zinc whisker particles. Any of these elements can threaten the computer environment equilibrium.

**ESD Cleaned
Environment**

AlphaC3s' core business is in the specialist field of deep de-contamination and Electrostatic Discharge (ESD) treatment of computer centres and data halls. The management and key staff have over 30 years combined experience of the data centre environment.

As a company we are fully insured, all equipment is tested to the appropriate standards and full site specific method statements, risk assessments and COSHH sheets will be provided to all clients before any work is undertaken

If you wish to organise a free, no obligation, survey please contact us and we will be happy to arrange.

AlphaC3 Limited - Computer and Workstation Cleaning Service

We have all heard the quote from the University of Arizona research paper that "there are more germs and bacteria on a keyboard than on a toilet seat". Well the facts are further supported by other research and include;

- 5 times dirtier than a toilet seat
- 150 times the acceptable limit for bacteria
- Poisoning bugs MRSA, e.coli, coliforms, staphylococcus aureus and enterobacteria found in most tests
- 40% more bacteria found on male colleagues mouse
- A keyboard is the third dirtiest thing you touch after light switches and money
- A dirty screen will lead to eye strain, nausea and headaches
- Most PC users eat food at their desk leading to particle deposits in between keys
- Finally, hot desking and shared resources in an office is the number one reason for passing germs across the workforce

Can you afford not to have your workstations professionally cleaned?

AlphaC3 Limited

Kingscavil House, Balado, Kinross KY13

tel: 0845 0030970

email: enquiries@alphac3.co.uk

web: www.alphac3.co.uk

Why should you have the workstation cleaned?

1. Reduces Staff Sickness Absence

How to order?

The service is priced on a per workstation basis as follows;

Raise a Purchase Order and send to the address or email shown and we schedule an appropriate time to do the work.

Or

Ask for a written receipt from one of our team and then schedule an appropriate time with our employee to complete the work.

Or

Give us a phone and we will be happy to send a written quotation for you to process.

Create the right impression for both your staff and visitors.

Finally, consider the following...

If you save 10-day's a year through illness prevention and subsequent absence it pays for one of the following;

- 120 PC's Professionally cleaned
- 20 PC's Professionally cleaned bi-monthly
- 10 PC's Professionally cleaned monthly

Remember staff often do not clean their workstation as they do not see it as their responsibility, cleaners are not insured and you do not have the time. AlphaC3's cleaning service resolves these dilemmas, easily and effectively.
